# thirstea® Brewed Tea Concentrate System

## *A complete tea concentrate system with advantages in convenience, consistency, and quality*

The ThirsTea program from Lyons offers the kind of convenience, consistency and quality that is unmatched by either fresh brewed or other tea concentrate systems. ThirsTea is ideal for any foodservice operator interested in high volume capacity or freshness spread throughout the day.

### **On Demand Post Mix Systems Eliminate Waste**

The ThirsTea program features both gallons and BIB packaging for brewed tea with the push of a handle. This “on demand” post-mix concept features shelf stable brewed tea concentrates that are mixed as required throughout the day, not mixed and held and subject to spoilage like fresh brewed.

### **Clearly Consistent**

ThirsTea brewed concentrates retain perfect clarity, never cloud, and always maintain a mild tea flavor that is never bitter.

### **Brewed Tea Quality**

ThirsTea is 100% brewed tea concentrate, prepared from choice India and Ceylon cut black tea leaves. Compare ThirsTea to lower quality concentrates made all or in part from instant tea - ThirsTea is quality you'll be proud to serve.

### **DISPENSING EQUIPMENT PROGRAM**

- ◆ ThirsTea brewed tea concentrates are part of the Lyons Beverage Systems Program.
- ◆ User-friendly dispensing equipment & service provided to qualifying accounts.
- ◆ A variety of equipment systems available for the line connected dispensers and batch type use.

### **HIGH YIELD CONCENTRATE FOR BATCH MIXING**

Just add one 4 oz. bottle to 3 gallons cool tap water and brewed tea is ready-to-drink.

Remains crystal clear for days at ambient temperatures without spoilage. Great for catering and mobile operators by keeping costs at a minimum with no waste. The fastest and simplest way to serve a quality glass of brewed tea.

## **PRODUCT LIST**

ITEM	DESCRIPTION	PACK	DILUTION RATIO
662	High Yield Unsweetened Tea	24/4 oz.	95 + 1
